

```
#include <iostream>
using namespace std;

class Mammal {
public:
    Mammal()
    {
        cout << "Mammals can give direct birth." << endl;
    }
};

class WingedAnimal {
public:
    WingedAnimal()
    {
        cout << "Winged animal can flap." << endl;
    }
};

class Bat: public Mammal, public WingedAnimal {

};

int main()
{
    Bat b1;
    return 0;
}
```
